

Watch the fire burn, and the water flow
Plant your feet on the earth, as the wild wind blows

Water puts out fire
Fire turns water into steam
Santa leaves a sooty footprint
Water makes it clean
Water makes it clean

Watch the fire burn, and the water flow
Plant your feet on the earth, as the wild wind blows

Four elements, there's magic everywhere
Fire and water
Earth and air

The Earth is our home, it gives us everything we need
Food from the land, fresh air from the trees
From the trees....

Watch the fire burn, and the water flow
Plant your feet on the earth, as the wild wind blows

The Earth is our home, it gives us everything we need
The Earth is our home, it gives us everything we need...
